

**TAMPER  
PROOF**

The *Euro* Tamper Proof Advanced Guardrail is another solution to safe tower assembly.

The ergonomic design lends itself to quick easy assembly and provides collective fall prevention before the operator accesses the platform and cannot be removed before the operator descends from the platform.

The specially designed guardrail units can be used in conjunction with the *Euro* Ladder Frame range of towers.

## Standard Features include...

- Correct guardrail heights achieved every time
- Fast, safe assembly and disassembly
- Collective protection before the operator accesses the platform
- Guardrails cannot be removed without descending and removing the platforms first
- Double torsion stainless steel spring

**Tower Assembly  
Training Available**
